

ABDULLAH IBRAHIM

lawale.ibrahim@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Senior Data & Business Intelligence Analyst with 5+ years of experience building enterprise analytics solutions across financial services, healthcare, and public sector environments. Advanced practitioner in SQL and Power BI with expertise in data modeling, KPI framework design, and automated reporting pipelines. Authorized to work in the United States. Proven track record of translating complex business requirements into scalable analytics that reduce manual effort, improve data integrity, and enable confident executive decision-making.

TECHNICAL SKILLS

- **SQL / Databases:** Advanced SQL (CTEs, window functions, query optimization, joins), Snowflake, Azure SQL
- **BI & Visualization:** Power BI (DAX, data modeling, performance tuning), Tableau
- **Languages:** Python (Pandas, NumPy), Excel (Power Query, Pivot Tables)
- **Data Modeling:** Star schema design, Fact/dimension tables, Relational modeling
- **Analytics:** KPI framework design, Trend & variance analysis, Root-cause analysis, Executive reporting
- **Other:** Jupyter Notebook, Git, Data governance, Anomaly detection, Reconciliation controls

PROFESSIONAL EXPERIENCE

British Business Bank

Jan 2024 - Apr 2025

Performance Analyst (Data Analytics)

United Kingdom

- Led development of enterprise Power BI dashboards used by senior leadership for cross-department performance reporting and operational risk monitoring, reducing report generation time significantly.
- Designed and implemented scalable SQL-driven data pipelines on Snowflake and Azure SQL to automate recurring reporting workflows, eliminating manual effort and improving data reliability.
- Partnered with business stakeholders across departments to define and standardize KPIs and metric definitions, creating a unified reporting framework adopted organization-wide.
- Conducted trend and variance analyses using Power BI and SQL to identify performance bottlenecks, informing operational improvements and strategic resource allocation
- Delivered ad-hoc analyses and Power BI dashboards to support C-suite strategic planning cycles, enabling faster decision-making

Sheffield Health & Social Care NHS Foundation Trust

Oct 2022 - Jan 2024

Information Analyst

United Kingdom

- Built operational Power BI and Tableau dashboards to monitor healthcare service performance, capacity utilization, and patient-flow metrics across clinical departments.
- Analyzed large, complex healthcare datasets to detect anomalies, data quality issues, and performance trends, enabling timely intervention by clinical and operational teams.
- Automated recurring regulatory and operational reports using SQL and BI tooling, improving report timeliness and cutting manual preparation by hours per cycle.
- Collaborated with clinical, operational, and finance stakeholders to translate ambiguous business requirements into actionable analytics deliverables.
- Implemented validation and reconciliation controls with SQL scripts in Snowflake and Azure SQL to enforce data integrity across interconnected reporting systems, resulting in fewer data errors and more reliable reporting

Department for Work and Pensions

Nov 2021 - Sep 2022

Statistical Analyst

United Kingdom

- Extracted, transformed, and analyzed large government datasets using advanced SQL techniques such as CTEs, window functions, and query optimization, delivering data that informed policy evaluation and operational decisions
- Optimized complex SQL queries and reporting workflows, improving data processing efficiency and reducing runtime for high-volume batch jobs.
- Produced validated analytical reports summarizing trends, anomalies, and KPIs for senior internal stakeholders and published policy outputs.
- Applied rigorous quality-assurance processes, including automated validation scripts in Python, to ensure statistical outputs met regulatory standards, reducing data errors and maintaining compliance

Mabeli Technologies Ltd

Nov 2017 - Dec 2020

Data Analyst

Nigeria

- Built Tableau dashboards visualizing workforce analytics, employee turnover trends, and operational performance metrics used by HR and leadership.
- Performed data cleaning, validation, and transformation to ensure reliable, audit-ready reporting outputs.
- Presented data-driven insights to senior leadership, directly informing workforce planning and productivity improvement strategies.
- Automated recurring reporting processes, reducing manual data preparation effort and improving delivery consistency.

EDUCATION & CERTIFICATIONS

Sheffield Hallam University, UK <i>M.Sc., Big Data Analytics</i>	<i>UK</i>
Ladoke Akintola University of Technology, Nigeria <i>B.Tech., Mathematics</i>	<i>Nigeria</i>

CERTIFICATION

- Oracle Cloud Infrastructure (OCI) Foundations Associate
